All homework problems come from the 'Exercises' section of the text unless otherwise noted. Homework is never collected but we will go over selected problems at the beginning of some classes if there are questions. The dates below should act as a guide to help you keep an even pace throughout the semester.

It is highly suggested you complete the assigned primary problems as a minimal set but should feel free to do additional problems if needed. These problem sets are designed to help students understand the conceptual material behind these topics as well as gain computational proficiency; both skills are necessary to achieve success on projects and exams in this course. You are encouraged and always welcome to come to my office to go over solutions to the problems.

Due Date	Section	Primary Problems
F 24 January	9	none
M 27 January	9	1-4, 8-9
W 29 January	9	10-12
F 31 January	9	15, 17, 18-23
M 03 February	9	26, 29, 33
