Decision: Minor Revise

Dear Dr. Shepard:

I have received two reviews of your manuscript "*Radar observations of E-class asteroids 44 Nysa and 434 Hungaria*" (MS #I10258). Both reviewers are generally favorable and have offered some minor suggestions to improve the paper. Would you please consider revising your manuscript along the lines of these reviews?

Please indicate in detail how you respond to each point raised by the reviewers when resubmitting your manuscript. Failure to return a detailed response to the reviews may result in processing delays.

Before resubmitting, please check your manuscript throughout to insure it is formatted to *Icarus* style. Guidelines concerning *Icarus* style may be found on our web site: <http://icarus.cornell.edu/>.

Sincerely,

Philip D. Nicholson
