Preliminary Homework

Read sections 1.1-1.6 carefully. If at any point you feel uncomfortable with the material, work some odd problems from the section as practice to remind yourself of the mathematics involved. This material was covered explicitly in your Precalculus courses and you are expected to be comfortable with all of the techniques discussed even though you may have taken the class some time ago. I am available during office hours and appointments to help with any problems that arise through the process. This reading should be completed in addition to your regular work for this class and be completed before the third class period on 1/26/10.
